

The Alliance With Gaia

Passage Seven

Onwards..the Alliance With Gaia is to care for the Earth nature, the animals, one another. It is not to lock horns with anyone with differing views and practices remember the peace of the lake and forest, inner silence will help you find the truth- intuition and there is much mis information about.

The spectre of “Frankenstein” or is it “progress” is here and it has long been foretold.

Here below is a quote from a First Nation poet expressing reverence and connection to nature.

“Spirit keeper of the South, Wolf, Be with me. Help me to remember to love and feel compassion for all mankind. Help me to walk my path with joy and love for myself, for others, for the four legged, the winged ones, the plants and all creation upon Mother Earth. Show me it is right for me to make decisions with my heart, even if at times, my heart becomes hurt. Help me to grow and nurture my self worth in all ways.”

Vera Dery 2002 (First Nation)

Empathy, care, respect for nature the animals and one another transcend perceived differences.

If we take a strictly materialist stance, plunder and exploitation are justified.

In the film “New Life” on the Pegasus Healing Blog people have remarked how they enjoy seeing green open space, the freedom of the sheep, natural curiosity of the lamb and maternal care.

We do not believe that animals are “dumb” or fit only for plunder as non sentient commodities or that they are sentient disposable “models” whose existence is only permissible by humans. It seems strange that we would ever want to try to reduce the natural world to such things.

We see very quickly what tiny specks we are in the cosmos when nature moves. The deep stains on the soul of humanity are linked to coldness, cruelty and fat controller mechanisms.

Its a wonderful thing to experience and express human warmth its not intellectual its a feeling, we become warmer by clearing and understanding our shadow.

We don't have to study neurophysiology to understand that warmth, kindness and empathy are what counts in this troubled world of ours.

The rational mind which compares, analyses, computes, judges

measures can justify anything, that is not to say that the rational mind cannot be a useful tool it has its limitations also. We embrace softness and intuition like a reed in the wind.

Animal & Nature Projects

Camilla feels a strong connection to the lions. She has written a descriptive narrative about them not included here.

What is included here is the empathy and connection for the animal which is expressed in a way unique to her.

Spend a few moments looking at the lion drawing below and see what information comes to you.

Learning About Lions

For a long while I felt like drawing a lioness I've never drawn much and every-time I tried, it didn't look any good. After deciding to learn more about Lions. I found myself looking at a beautiful photo of lioness one day and was finally able to draw something that felt good. It was really fun to do.

Perceptions:

The spectre of part human part machine or part animal part machine once the province of science fiction is described by some as an exciting development for the 21st Century, they are called "cyborgs" - cybernetic organisms lets have a look at a human aspect first and its described potential. Be detached and consolidated.

Q.1. How does the presentation "feel" and what does it mean to you?

Q2. What did you learn?
