

# The Alliance With Gaia

## Passage Twelve

*Pegasus Healing*

Thank you for joining the second stage of the journey. We needed this pause so our wits are sharper. We have journeyed far and there is way more ahead as we stand on the platform at the station.

We aim for tenacity and lightness of being. Linking with nature, and the animals the three graces, the way shown to us, as the emotional wave now crashes around in these times.

We are travelling onwards.. provided you have your travel pass? and have read the terms and conditions? Please have it to hand.

First we have an appointment at the Court of Versailles in Paris we must not be late. The White Rabbit is our guide. Come now let us listen to the music of Louis Couperin Court Musician 1626 -1661 to The Sun King Louis XIV 1638-1715

<https://www.youtube.com/watch?v=DT2D7Kp3k3c>

How we feel is important, we often sense discordant sounds and energies, so we can at times forget the rich and sumptuous textures of sound linked to bygone eras.

How did you feel when listening to Couperin?

Surrounding the Palace of Versailles are forests, there is a beauty and mystery about forests.

“Trees are beings connected to other trees, locally and non locally. Stuart Wilde refers to trees as “The Sentinels Of The Eternal Tao”.

Trees are the lungs of the earth they support the web of life and form an energetic grid.

In his video clip The Love Of Trees Stuart tells us more about trees.

<https://www.youtube.com/watch?v=5b4mIFclm6E>

Trees are healing and a walk in the woods or forest helps us all. Green spaces where ever we live are important for well being and conservation.

I had an experience some years ago walking through a park in London, I knew the park very well and walked there for 25 years. Since moving I returned years later and felt the trees in my heart, first a large silver birch tree and then oaks and others trees. They were not lost to me but were with me.

I know some of you have had this experience of internalization, of nature we are all connected.

It is also interesting how people relate to trees, let's see what Julian Hight has to say, the video clip was made in association with [www.pegasus-animal-healing.com](http://www.pegasus-animal-healing.com).

## Biodiversity.

Bio is derived from the Greek word bios which means life.

Biodiversity is the range of life forms on this planet.

From viruses, bacteria, fungi other plants and animals including ourselves and genetic material.

A single tree in a tropical forest for example can be a habitat for a multitude of plant species, amphibians, insects, reptiles, birds and mammals.

Even in temperate climates trees we can observe support a range of biodiversity.

“All life depends upon connections”

## The Diversity Of Life - video clip - An Ecologist's Point Of View

### Questions

1. What new have you learned about trees?
  - b) How can we help the trees?
2. Do you have a favourite tree and or place in nature where there are trees?
3. What did you learn from Stuart Wilde's video on trees.?
4. What did you learn from the third video?
5. Julian makes a joke in the video clip for my part I would not call a tree an oak anything connected with darkness, but people make jokes and in a way its better than getting serious. Do you agree?
6. What types of plants and animals live in trees near you?
7. Name 5 examples of animals and plants living on or in trees?
