

The Alliance With Gaia

Passage Twenty Two

Pegasus Healing

Thank you, you have arrived at this time.
Thank you for sharing the journey here and now..
“The Road Less travelled.”

So where do we go from here?

Onwards ...if you have a care to continue. The Alliance With Gaia is to care for the Earth, nature, the animals and one another.

The upheavals we witness in the world have long been foretold but there is light and goodness also.

“The end of days” is what Stuart Wilde referred to as these times, geopolitical upheavals, the emergence of the global shadow which must come out to be healed.

We find potentially engulfing negativity around us and within.

Through tenacity we can clamber over, up and around it. We can transcend the baggage we began with even giggle sometimes at how our former self may have behaved.

We catch ourself falling back and then we realign, this journey is an opportunity to grow in so many ways. Nature, the animals are a celestial link and guide in 3D and the aluna.

Perception helps us see the other side, trust your intuition and inner guidance. Perception is linked to common-sense, the power of the light within is for service not wielding power over others.

As people work to heal they have more light and Grace comes around to help and guide.

The God force is freeing and magnanimous beyond the illusory dictates of “fat control.”

Wherever we are, we align to the golden sentiments as best we can. The inner journey-

[Golden Sentiments](#)

So now let us have a look at a different type of non-human primate:

The Vervet Monkey.

Chlorocebus pygerythrus is an old world monkey native to Africa. There are 5 species and they were introduced to Florida, Cape Verde and The Ascension Islands.

Vervets are used in the medical “research” industry and the pet trade. In their natural habitat like many animals they suffer the affects of human encroachment

Fortunately humans can be useful to wild life by not plundering, and by providing/allowing for them harmonious spaces ,just as we see for example with barn owl conservation in England.

The web of life is interconnected.

Vervets like all the non human primates are so intelligent, fascinating and expressive. Please see the video clip link below of helpful humans and an orphaned, traumatised baby Vervet .

The monkey is given back her birthright of love , care, the social group preceded by humane, respectful treatment from humans.

Questions

1. What emotions and feelings can you independently observe/discern from the baby Vervet in the following situations.

- a) her initial arrival at the sanctuary
- b) the progress of her healing
- c) her introduction to Mrs. Gold
- d) her introduction to the troop/ any other observations

2. In the video “Behold The Beauty Of Gaia

[Behold The Beauty Of Gaia -Video Passage21](#)

what do you feel the message is?

3. How many parts is the film made up of ?

- a) What symbology is there?

Year2

(Please email your comments re Year 2)

a) Did the course meet your expectations?

b) what do you feel you have learned?

c) What is your favourite Passage?

d) Any further comments?

Thank you
